## SSA's Roadmap Assessment

Managers periodically need to quickly develop a general assessment of operations. SSA's *Roadmap* projects deliver timely assessments and sensible roadmaps for performance improvement. We utilize a straightforward methodology that addresses four basic questions:

1. Is your strategy clear?
2. Have reasonable goals been established that define success?
3. Do opportunities exist to improve productivity by:
  - a. redesigning core processes and/or
  - b. improving how people are organized, managed and developed?
4. How is performance managed?

Our *Roadmap* projects include examination of key operating results, systems, processes and procedures. We review vital data/documentation, observe critical workflows and gather essential insight from your staff and your customers.

The project concludes with a detailed presentation of findings and recommendations. Significant recommendations are accompanied by cost/benefit estimates and implementation outlines – a *Roadmap* to improve your performance.

If you are interested in learning more about the SSA *Roadmap* Assessment, please contact Will Williams ([wwilliams@consultssa.com](mailto:wwilliams@consultssa.com)), Clay Kittrell ([ckittrell@consultssa.com](mailto:ckittrell@consultssa.com)) or Errol Labat ([elabat@consultssa.com](mailto:elabat@consultssa.com)) via email or phone at (225) 769-2676.
